

NEXIUM INTELLIGENCE

Where AI Meets Blockchain

 **NXI on BNB Chain**

WHITEPAPER v1.1 | October 2025

Introduction

-  Nexium Intelligence is a revolutionary AI-driven ecosystem designed to bridge blockchain and artificial intelligence.
-  At the heart is **\$NEXIUM (NXI)**, a utility token that powers intelligent interactions, secure transactions, and decentralized innovation.
-  From AI chatbots that learn your trading style to data-driven insights that anticipate market moves, Nexium delivers smart DeFi infrastructure.
-  Core principles: performance, transparency, security, and community governance.
-  Built on BNB Chain for scalability and wide accessibility.

Mission & Vision

Mission

- Empower users, traders, and developers with autonomous AI tools that think, analyze, and evolve
- Bring AI to everyone through tokenized access and fair economics
- Support builders with easy-to-use APIs and SDKs
- Merge AI with blockchain transparency and security

Vision

- Make AI open, decentralized, and human-centered for the Web3 era
- Become the global multi-purpose AI assistant of crypto
- Create decentralized ownership of intelligent systems
- Bridge traditional technology users to decentralized AI solutions

Problem Statement

Centralized AI

Access, control, and data are concentrated among a few tech giants, creating power imbalances and gatekeeping innovation.

High Costs

Advanced AI models remain expensive for individuals and startups, limiting adoption and creating barriers to entry.

Limited Accessibility

Powerful tools are complex or gated behind paywalls; crypto users lack tailored AI assistants for their specific needs.

Data Privacy

Users lack control and transparency over how their data is used in AI training and service improvement.

Fragmentation

AI, trading, research, and workflow tools exist in separate silos, creating inefficiencies and poor user experiences.

Solution & Core Features

Nexium Intelligence bridges the gap between AI and blockchain through an accessible, transparent, and scalable ecosystem — empowering users, developers, and businesses with intelligent tools.

AI + Crypto Integration

Seamless synergy between intelligent models and DeFi rails, creating a unified experience across both domains.

Smart Conversational Agents

Trading, research, and project management assistants that adapt to user behavior and preferences.

Decentralized Governance

Community-driven decision making via NXI with transparent on-chain governance mechanisms.

Secure & Scalable

Built on BNB Chain with auditable smart contracts and high-performance infrastructure for reliability.

Developer Platform

APIs, SDKs, plugin marketplace, and pay-per-use functionality via NXI token for developers.

Zero Tax Policy

0% buy/sell tax for fair trading conditions, transparency, and maximum value retention.

Tokenomics Overview

Token Details

Ticker: NXI

Chain: BNB Chain (BSC)

Total Supply: 1,000,000,000 NXI

Contract Address: 0x0a0918305b5c74D1f202C3696D194BFa79F0602F

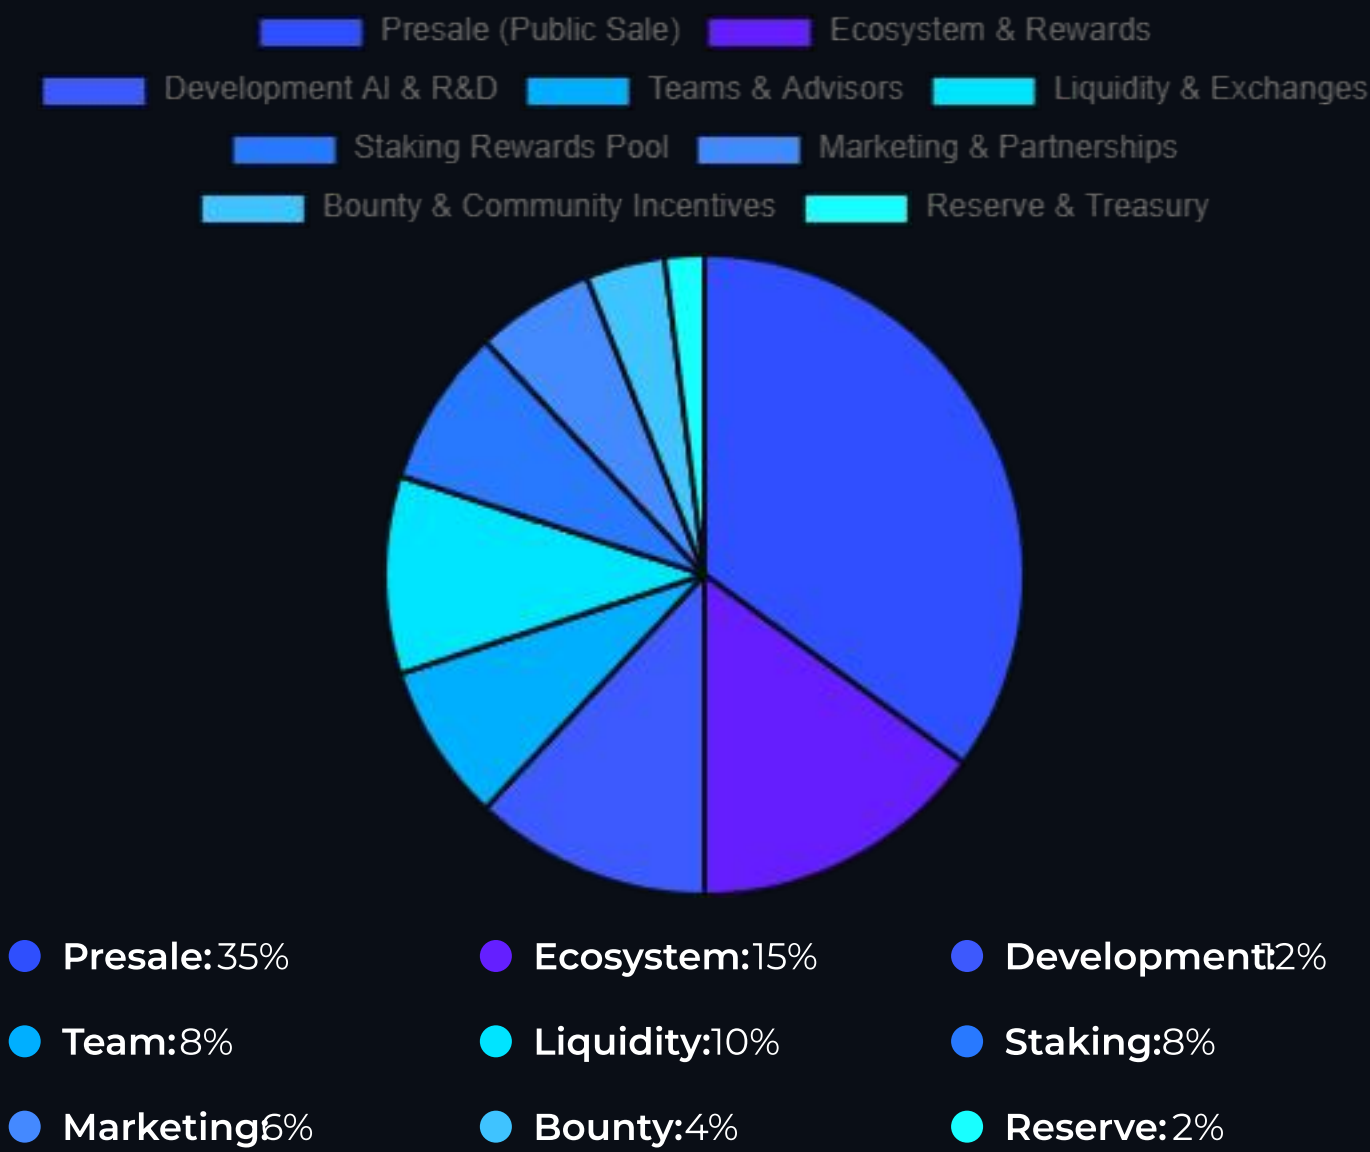

Token Policy

Buy Tax: 0%

Sell Tax: 0%

Unsold Tokens: Permanently burned

Token Allocation

Overview

- Total Raise Target: \$50,000,000 USD
- Total Presale Tokens: 350,000,000 NXI | Rounds: 10 progressive
- Starting Price: \$0.0249 | Final Presale: \$0.2640 | Listing: \$0.28

Growth Model

Each round increases token price by ~30%, with hardcap growing from \$3.5M to \$6.5M. This ensures fair access, sustainable growth, and rewards for early supporters.

Presale Rounds

Round 1 Tokens: 140.56M NXI Price: \$0.0249 Hardcap: \$3.50M	Round 2 Tokens: 118.24M NXI Price: \$0.0324 Hardcap: \$3.83M	Round 3 Tokens: 98.98M NXI Price: \$0.0421 Hardcap: \$4.17M	Round 4 Tokens: 82.22M NXI Price: \$0.0547 Hardcap: \$4.50M	Round 5 Tokens: 67.98M NXI Price: \$0.0711 Hardcap: \$4.83M
Round 6 Tokens: 55.89M NXI Price: \$0.0924 Hardcap: \$5.17M	Round 7 Tokens: 45.76M NXI Price: \$0.1201 Hardcap: \$5.50M	Round 8 Tokens: 37.33M NXI Price: \$0.1562 Hardcap: \$5.83M	Round 9 Tokens: 30.36M NXI Price: \$0.2031 Hardcap: \$6.16M	Round 10 Tokens: 24.60M NXI Price: \$0.2640 Hardcap: \$6.50M

Why Join Nexium Presale

✔ Early Advantage: Start at lowest price

✔ Fair Tokenomics: 10 transparent rounds

✔ Deflationary: Unsold tokens auto-burned

✔ Strong Launch: Listing at \$0.28 per NXI

AI Chatbot & Ecosystem

Nexium AI Assistant

General Q&A: Business, finance, education, and crypto expertise

Market Insights: On-chain & market data analysis; research summarization

Personalization: Learns user preferences while respecting privacy

Voice Mode: Multi-language support with phased rollout

Workspace & Integrations

AI Writer: Email Composer, Resume Builder, Content Generator

Business Assistant: Marketing plans, product descriptions, code assistance

Platform Support: Telegram/Discord bots, Web dashboard, Mobile apps (iOS/Android)

Developer Platform

API + SDK: With NXI-based metering for transparent usage

Staking Benefits: Increased quotas and usage rewards for NXI stakers

Ecosystem Access: Connect your apps to the Nexium intelligence network

Development Roadmap

Nexium Intelligence — Building The Future of AI + Blockchain from 2025-2027+

Q4 2025

Foundation & Token Launch

- NXI Presale (10 rounds, target \$50M); smart contract deploy + audit (BSC)
- Website, dApp, Wallet Connect; Whitepaper + branding
- Nexium AI Chatbot Alpha (text-based)

Q1 2026

Product Foundation

- NXI listing on DEX + Tier-1 CEX; AI Chatbot v1.0 (multi-domain)
- Begin mobile app dev; activate NXI utility (credits, subs, premium tools)

Q2 2026

App Expansion

- Mobile App Beta (iOS/Android); Voice Mode; personalization
- NXI utility: pay, earn for testing/training; web dashboard

Q3 2026

Ecosystem Expansion

- AI Workspace tools; Business Assistant; NXI Staking platform
- Telegram/Discord integration; public API

Q4 2026

Enterprise & Cloud

- AI Suite for SMBs/creators; NXI payment gateway; AI Cloud Platform
- Burn all unsold presale tokens

2027 & Beyond

Global Utility & Full Expansion

- Q1-Q2: Nexium DAO; AI Intelligence 3.0; rewards for usage/contributions
- Q3-Q4+: Autonomous assistant; cross-platform + enterprise partnerships

Token Utility

Access & Payments

- Subscriptions, AI credits, and in-app purchases via NXI
- Pay-as-you-go for API/SDK usage; partner services

Network & Governance

- Staking for rewards and increased usage limits
- DAO governance: propose/vote on features and treasury

Ecosystem Flywheel

- Earn NXI by testing, training modules, contributing data/feedback
- Burns of unsold presale tokens to support long-term value

Goal: Make NXI the core utility token for every Nexium interaction.

Conclusion & Social Links

Join the Nexium Revolution — where technology learns, trades, and grows with you.

- ✓ Strong fundamentals: AI + DeFi integration
- ✓ Fair tokenomics with transparent presale structure
- ✓ Real utility through NXI token ecosystem
- ✓ Multi-year roadmap with clear milestones

Next Step: Round 1 starts soon — secure early access.
